2. The Convener, PAC meeting welcomed and introduced external members of Program Assessment Committee and thanked him for sparing his valuable time to attend the meeting.

3. The Member Secretary, PAC meeting with the permission of the Convener, presented the agenda of PAC.

4. The PAC of the department had discussed following agendas:

Agenda 1: Approval of the open elective course outcomes (COs) for the revised final year syllabus curriculum in electrical engineering.

Suggestions: The members had suggested the revision in the COs according to align with the updated course content.

Agenda 2: Emphasis on Interdisciplinary and Software Skills: E.g., AI-driven control, machine learning applications in power systems, IoT-enabled energy management.

Suggestions: The use of AI and ML in power system applications was encouraged, but it is not yet widely implemented. It was suggested to include two-three experiments in laboratories based on machine learning.

Also, students should be guided to take up industry-related B. Tech projects, especially in power systems and distribution automation.

The department also plans to organize industrial visits such as to SLDC.

Agenda 3: Industry alignment and skill-based content: such as power system automation, advanced control systems, EV technology.

Suggestions: Since the setup of EV lab is expensive. Therefore, the department plans to organize guest lectures, workshops, and industrial visits where assembling of EV rickshaw or battery designing is done.

Agenda 4: Hands-on and practical exposure.

Suggestions: A workshop on transformer designing and PCB designing can be organized in the department for their experience for 2nd year and 3rd year students.
