In the course Fundamentals of Electronics Engineering (BEC-101/201) running in B Tech First Year, K-Map simplification should be kept up to 4 variables only. 3. One tutorial class may be allotted for the course Cyber Security/Python Programming. Application of AI tools may be included in the curriculum of Python Programming. (BCC-402). 4. Microwave Engineering(BEC-064) and Optical Communication (BEC-058) should be floated as Core Subjects, instead of elective ones. 5. Gamification method may be adopted in the classroom teaching, to invoke the interest of the students. 6. Cadence & Virtuoso tools must be made available in the laboratory. 7. Students must have the knowledge of PCB design. 8. Projects should be based on current technology trends such as AI, ML etc.
